Naveen Dudhyal

Frontend Developer || Next.js || React.js

Email	dinaveen4018@gmail.com
Phone	8050927428
Location	Bangalore

OBJECTIVE

- Front-End Developer with 2 years of proven leadership and meaningfully contributions to teams of varying size and scope. With my results-driven mentality.
- Worked with CMS project like Page builder form page creation to hosting with dynamic database through Vercel and Next.js as backend.
- Sql queries written by Prisma ORM and I found working with ORM like prisma makes developer life easy.
- For Authorization and Authentication I have gone through NextAuth and Middlewares in depth.
- My journey won't stop it seems I love to be versatile and I don't limit myself when it comes to learning
- Having sound knowledge of React.js and Next.js with MySQL.
- Ready to put my skills under challenging environment and I'm confident about what I'm capable for and eager to improve my skills.

SKILLS

- Javascript Fundamentals + ES6
- Having a sound knowledge of React.js
- Proficient in HTML5 and CSS3
- Good at listening and explaining my own ideas

- Fast learner and can work in versatile environment
- Maintainable code writing with notes/comments wherever required
- Good knowledge of MySQL
- I'm good at using React Hooks,Custom Hooks,State Machine/Lifecycle,HOC

- Sound knowledge how Rest-api's works and it's real time uses.
- Typescript , Azure and Sonix ai these are the key Skills for me to handle files and transcription part.
- Next.js with prisma ORM used for backend logics and I have depth knowledge in Next.js

EDUCATIONAL QUALIFICATION

Field Of Study	School	Location	Date
Mechanical engineering	A G patil institute of technology	Solapur	May 2016 – Jun 2018

ACADEMIC PROJECTS

Property Builder website

React developer

Writ labs

Mohali

Start Date – Present

1. Fetching data and how to manipulate or use in your components that's quite easy with react-query and how to use cache which we get built in feature from react-query
2. Firebase authentication
3. Firebase cloud functions
4. Worked with Core team and follows a unique approach to keep code maintained
5. With the help of JS we can fetch but it takes lot of time and quite complicated to read or debug so I have choosed to work with the fastest and hassle free framework.(React.js).
6. Javascript is backbone for react.js here we can write any JS expressions in our components .

CMS Project

Frontend Developer

Writ labs

Mohali

Start Date – Present

1. Throughout the project, I utilized my strong understanding of React concepts, such as component-based architecture, state management, and lifecycle methods. I also leveraged my knowledge of modern web development technologies, including HTML5, CSS3, and JavaScript, to enhance the overall user experience.
2. This CMS project allowed me to enhance my skills in React development, while also providing me with valuable experience in collaborating with cross-functional teams and delivering a product that met the client's requirements.
3. Overall, my contributions to the CMS project demonstrate my ability to work effectively with React, tackle complex challenges, and deliver high-quality solutions that meet client expectations.

PROFESSIONAL EXPERIENCE

React.js developer

Freelancer

WFH

Nov 2021 – Dec 2022

- React and JavaScript has leads my carrier growth so far I would love to be involved with much more new things.
- Worked on challenging products and delivered finished products within timeline with quality work.
- Good at debugging issues and brainstorming.
- Mostly I have used functional based components but I do know about class based components.

Front-end Developer

Writ labs

Mohali

Jan 2023 – Present

- Demonstrated expertise in frontend development using React.js and Next.js, leveraging strong knowledge of JavaScript Fundamentals and ES6.
- Experienced in integrating Redux for state management and proficient in working with MySQL databases, while also being adept at utilizing React Hooks, Custom Hooks, and HOCs to optimize code efficiency and enhance user experience.
- Mentored 3 new junior front-end developers on team in expanding JavaScript, React,and Next.js skillset.
- I have been working with typescript a lot and I'm having strong base with data types control and data flow.
- I have been working on advanced features for drag and drop functionality and templates based pages.
- Good at splitting code and using it as helper modules.
